Re: Litigation Support Reference Letter for KGC Consulting Services Ltd.

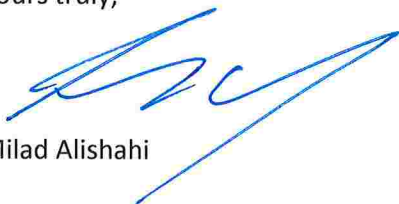

Dear Jerry

We appreciate the quality of service and expert report deliverable provided to MLTA in connection with the failure of a multi-residential project envelope. The independent analysis and assessment of the incurred remediation costs to the project envelope failure by the replacement contractor while maintaining operational occupancy of the premises was a significant monetary dispute.

The seasonal thermal constraint and costs associated with making good the envelope was of significant consequence, requiring extensive cost analysis due diligence.

The professionalism and expertise provided by KGC throughout was very supportive in moving the dispute towards resolution. Going forward we would definitely use KGC Consulting for future assignments or would provide a favourable recommendation to our construction litigation industry colleagues.

Yours truly,

Milad Alishahi
